MAHINDRA AUTOMOTIVE NORTH AMERICA TO ENHANCE COVID-19/CORONAVIRUS PROTECTIONS FOR EMPLOYEES

AUBURN HILLS, Mich. (Mar. 17, 2020)

In accordance with the recommendations of the State of Michigan, the CDC and the World Health Organization Mahindra Automotive North America has, and will continue to, take appropriate measures to limit the impact or “flatten the curve” of (COVID-19). The health and safety of the American people and the MANA family are paramount, that is why we are now requiring the vast majority of our personnel to work from home while also advising them to limit their contact with others as much as is possible. Aggressive sterilization practices and comprehensive visitor screenings are in place to ensure any and all on-site business is conducted in the safest manner possible. In light of COVID-19, MANA will continue to augment operations in-line with the recommendations and restrictions of government and healthcare professionals to ensure the safety and security of its employees, their families, and the country at large.

Rick Haas, President and CEO – Mahindra Automotive North America
